TAKE THE GUESSWORK OUT OF NUMBERS!

Imp+ is a unique print estimation software powered by a smart layout planning engine. Get accurate quotes, job routing data and a detailed job-card with a single click.

Minimalistic Interface

An interactive, simple, and easy interface to enter minimal data about the product you want to generate a quote for.

Independent of CAD & Prepress

Cost-based layout planning engine eliminates need to go to CAD or prepress for layout data.

Complex Quotes in Minutes

Super-fast computing using inhouse algorithms and latest frameworks to generate quotes in minutes.

Anyone Can Quote!

The accuracy of layouts and unique framework ensure perfect quotes irrespective of user skill and experience.

Leverage Benefit of Ganging

Use the power of ganging at the estimation stage to generate order winning quotes.

Flexibility

Apply multiple costing frameworks to a single operation, adding flexibility to the estimation process.

Amortization

Enable multiple logics to amortize fixed process cost and storage cost for staggered deliveries.

Automation

Automate downstream operations and packing to optimize core, box, and pallets, without manual inputs.

JOB ROUTING

Comprehensive job routing is computed to arrive at the final cost, enabling you to generate a detailed job-card.

CUSTOMIZABLE REPORTS

Report Template Designer Tool offers freedom to design quotations, tender quotes, job-cards, cost-sheets and more, in the format of choice.

Comprehensive Data Exchange

Imp+ estimation software can export comprehensive data of layouts, costs, operations, and materials used in print, XML, CSV, or MXML formats. You can pick the data required for your ERP/MIS.

Die line creation and finding ideal imposition and nesting schemes are key in estimation. Both are achieved seamlessly by combining InSoft's StylKIT CAD and Imp Layout Planner in estimation modules. **The die library is a very powerful feature that enables cost savings and die re-use. Adding process steps to the cost structure is very flexible and exporting estimate data to our ERP is a breeze through xml.** This is one of the smart investments we made lately in Express Pack Print.
