

Intelligent Imposition for Industry 4.0

InSoft

Is your imposition software
capable of doing:

- Unmanned imposition for Book-of-One?
- Dynamic imposition for multi-web and partial-web?
- Parallel Imposition of multiple books?
- Automatic spine calculation?
- Signature Ganging?

ESTIMATION: TAKE THE GUESSWORK OUT OF YOUR NUMBERS

Can your estimation system automatically select cost-efficient printing equipment & the optimal routing for your bound jobs?

High Volume | Medium Runs | Book-of-One | Print on Demand

- InSoft brings software intelligence to calculate the most optimized way to print a bound job
- Empowers your sales and CRM teams (with limited technical knowledge) to generate accurate quotes
- With single click generate complex estimates for sewing books with multiple parts or simple paper back
- Software goes to micro level to calculate different costs, not just approximation or XL formulae
- Generate quotes and job cards in the design & format of your choice

ESTIMATION DETAILS (CASE BINDING BOOK)

Layouts	Paper/Board	Printing		Lamination (Front)	Spot UV (Front)	Guillotine Cutting	Folding	Sewing	Book Block Making	Casing In	Shrink Wrap	Packing	Dispatch	
		Front	Back											
Layout 2 Inner Pages	24in X 36in → 2102 Sheets 191.206 lbs \$ 72.17	KBA \$ 452.12 1hr 9min.	KBA \$ 423.71 1hr 4min.											\$ 948.00 2hrs 14min.
Layout 1 Inner Pages	24in X 36in → 2102 Sheets 191.206 lbs \$ 72.17	KBA \$ 452.12 1hr 9min.	KBA \$ 423.71 1hr 4min.											\$ 948.00 2hrs 14min.
Layout Cover	26in X 40in → 1998 Sheets 350.029 lbs \$ 181.98	KBA \$ 464.35 1hr 11min.		MK 40 \$ 227.80 1hr 14min.	PTK 30 \$ 129.34 1hr 20min.	Polar 40 \$ 2.24 2.7min.								\$ 1005.72 3hrs 48min.

COST-BASED IMPOSITION: AUTOMATE & OPTIMIZE

How about upscaling your layout planning with intelligent imposition ?

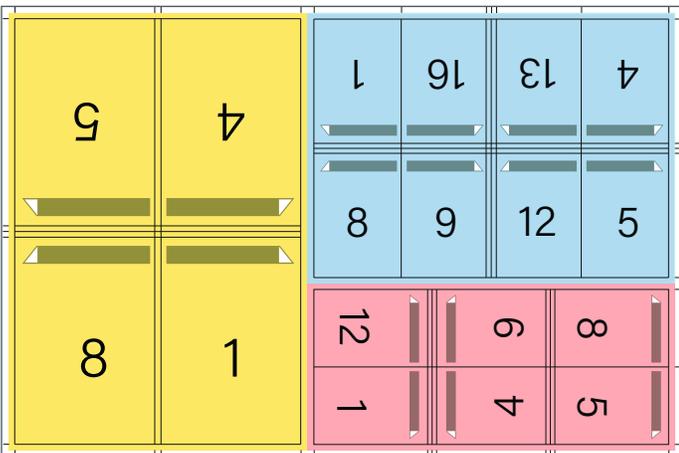

Remove your bottlenecks with Imp, the best imposition software that automatically generates accurate print ready layouts for different print devices, be it conventional offset presses, short format digital or continuous feed digital web presses.

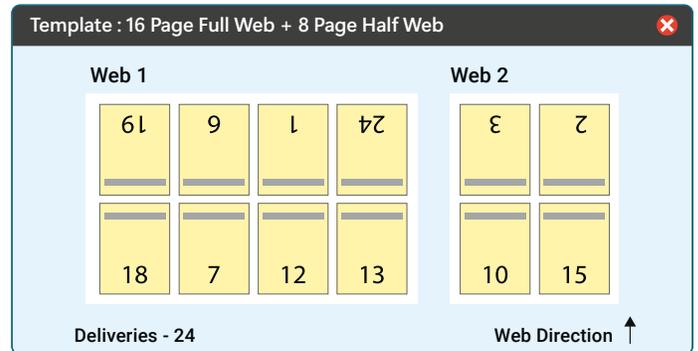

Selecting the right signatures and assembling them. No need for manual selection of folding templates and creating an assembly. Imp does this - Automatically!

Signature & cover ganging. Imp is the most powerful ganging engine that can identify, sort and gang signatures and covers based on paper, colors, quantities and trim size - Automatically !

Only automated solution for conventional webfed offset presses. Whether it's a single web, multiple web or press with slitter attachment, Imp offers full automation in web imposition.

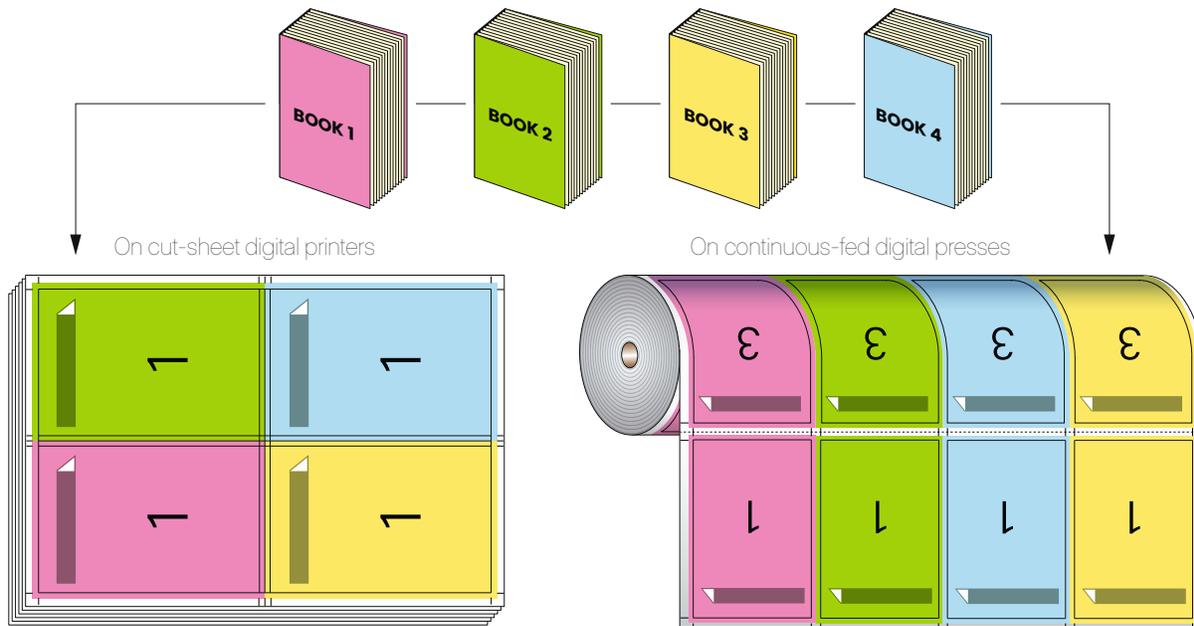

Automated selection of press, sheet/reel & workstyle. Software automatically selects the best sheet size / reel width, most economical printing device and workstyle. Change the required quantity and you might find the software automatically switch from offset to digital !

This software when used upstream in estimation and planning, will help you realize holistic automation !

Parametric cover template designer with auto spine thickness calculator. The cover designer utility allows users to define different covers - paperback, pre-laminated and jackets.

Parallel imposition of books. This innovative feature dramatically simplifies the complexity in creating imposition schemes where different books of similar sizes and page count are planned together in individual lanes/tracks on the same layout.

Is your current imposition able to match the speed of your digital print devices?

Imp software is the fastest and smartest imposition tool in the industry - be it impositions for cut-sheet or web-fed digital presses, it surpasses the expectations - and that too totally UNMANNED !

AUTOMATION & INTEGRATION

Imp Flow. A hot-folder based software application built on top of Imp software. It leverages the inherent intelligence of the Imp software to provide unparalleled automation in layout planning and imposition.

Switch Integration. Imp XML creator, a free app, allows SWITCH to automate file processing without any touch points. First time the file is touched is when it is sent on printing device.

.Net & REST API Integration. A comprehensive SDK (software development kit : API) on .Net and REST based API are available for integration with MIS/ERP, Book-of-One and Print-on-Demand Ordering Systems.

Comprehensive reports and data exchange. Imp software can export comprehensive data of layouts, costs, operations, and materials used in print, XML, CSV or MXML formats. You can pick the data required for your ERP/MIS.
